| | | |
|-------------|---|---|
| Note | 1 | Frequent change in Low tension network by Transferring parts of the network from one DT to another to manage the reliability & availability of power to consumer. |
| | 2 | Shifting of consumers from one DT to another DT due to various reasons like overloading of the network, faulty cable/ network, ongoing network augmentation. |
| | 3 | Installation of new DTs and partial network shifting from existing DTs to new DTs. |
| | 4 | Lack of Time Synchronization of the consumer and DT meters along with lack of IT systems to support retrospective meter reading of all the consumers. |
| | 5 | Theft of Energy meters from DTs in remote areas. |
| | 6 | Theft of Energy Meter wiring. |
| | 7 | Billing cycles of consumers changes from 45 to 35 days |
| | 8 | Consumers are billed on average basis where actual consumer data is not available in PL cases. |
